

BUSINESS PROBLEM

How can a retail company understand customer purchasing behavior to increase revenue, improve customer retention, and optimize marketing strategies?

Breaking Down the Problem

1. Low Customer Retention

- Customers are not purchasing frequently

Need to understand:

- Who are frequent buyers?
- Who are one-time buyers?

2. Ineffective Marketing Campaigns

- Discounts and promo codes may not be effective

Questions:

- Do discounts increase purchases?
- Which customers respond to promo codes?

3. Product Demand Understanding

- Which category performs best?
- Which products generate the highest revenue?

4. Payment Behavior Insights

- Which payment methods are preferred?
- Are digital payments increasing?

5. Seasonal Demand Variation

- Does season impact sales?
- Which season drives maximum purchases?

6. Customer Segmentation Problem

Need to identify:

- High-value customers
- Frequent buyers
- Discount-sensitive customers

RetailPulse **Business Questions**

- Which category generates highest revenue?
- Are discounts actually increasing purchase value?
- What is the total revenue generated by male and female customer ?
- Which customer used a discount but still spent more then the average purchase amount ?
- Which are the top/bottom 5 products with the highest average review rating.
- Average purchase: Standard vs Express shipping
- Do subscribed customers spend more ?
- Compare average speed and total revenue between subscribers and non-subscribers.
- Top 5 products with highest discount usage %
- Segment customer into new, returning and loyal based on their total number of previous purchase, and show the count of each segment.
- What are the top 3 most purchased products within each category ?
- Are customers who are repeat buyers (more than 5 previous purchases) also likely to subscribe ?
- What is the revenue contribution of each age group ?
